

For the sake of the workers' and environmental health and safety, chemicals are managed in various ways internationally. In this symposium, global regulations of SDSs, global GHS implementation, and Hazard Communication Standards will be mentioned and discussed. The objectives of this symposium are to comprehend the current status of global regulations on SDS, GHS implementation, and hazard communication and to discuss gaps, concerns, and future direction on global chemical management policies at workplaces. This symposium will be helpful especially for the policy makers, Industrial Hygienists, chemical manufacturers, and downstream users of the chemicals because it will give them global perspectives and practices of all the policies and its implementations and the insights for the future direction. Thru this learning and discussion, it is expected to implement global policies or amendment of the current policies for the worker and environmental health and safety.

Global SDS regulations

Raleigh Davis (American Chemical Council, USA)

Global Hazard Communication

Ann Johnson (3M, USA)

Background and future challenges of New (Material) Safety Data Sheet Scheme in Korea

Naroo Lee (KOSHA, Korea, Republic of)

MODERATOR

Eun-ah Cho

SPEAKERS

Raleigh Davis

Raleigh Davis has been with ACC since Fall of 2019, as a Director of Global Affairs. Within ACC, her work focuses primarily on global chemicals management regulations and GHS. In her current role, she works with both members and governments around the world to implement regulatory systems that are risk and science based. Prior to ACC, she was the Director of Environmental Health and Safety at the American Coating Association (ACA), where she worked on US TCSA implementation, state level issues, and international regulatory concerns surrounding paints and coatings. Prior to working for ACA, she worked as a Regulatory Analyst for Wiley Rein LLP, and as a Consultant with Booz Allen Hamilton. Raleigh Davis holds a B.S. in Earth Science and M.A. in Environmental Policy, both from the University of Pennsylvania.
